

Surface trough to bring afternoon showers to the island of St. Lucia

 **Urgency:** Expected

 **Severity:** Minor

 **Certainty:** Likely

Issued:

Wed 15 Apr 2026
17:35

Effective:

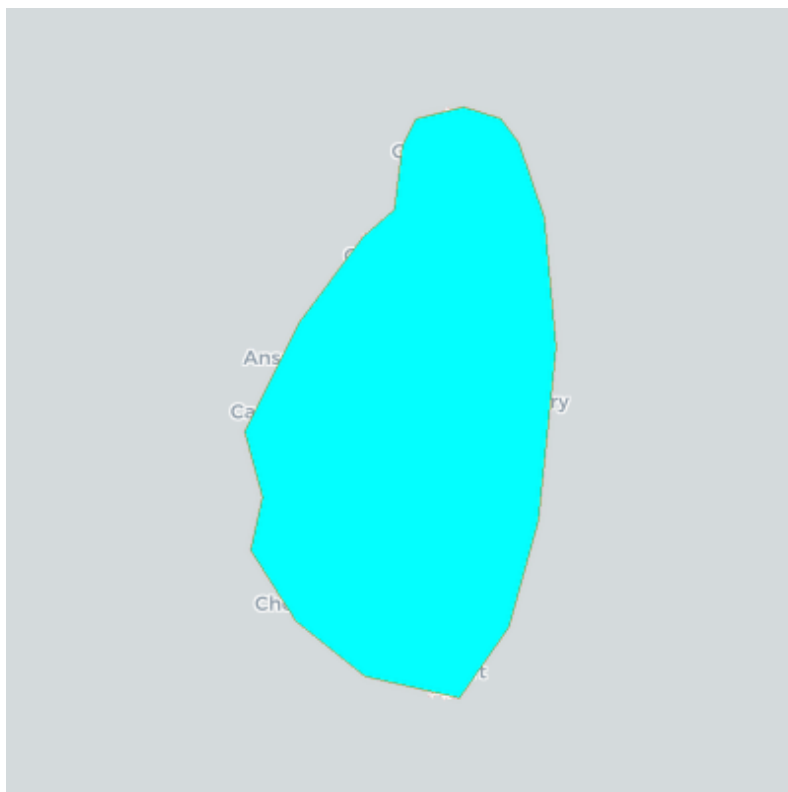

Mon 09 Feb 2026
14:00

Onset:

Mon 09 Feb 2026
17:00

Expires:

Tue 10 Feb 2026
08:00

Area:

Saint Lucia

Description:

A surface trough is expected to bring light to moderate showers over the southern part of the region within the next 3 to 5 hours. This rainfall could result in localized flooding and landslides, particularly in low-lying and flood-prone areas.

Instruction:

Residents and motorists are advised to remain vigilant and monitor official weather updates from St. Lucia Meteorological Services. Residents in areas prone to flooding should take necessary action to protect life and property.
